November 16, 2021

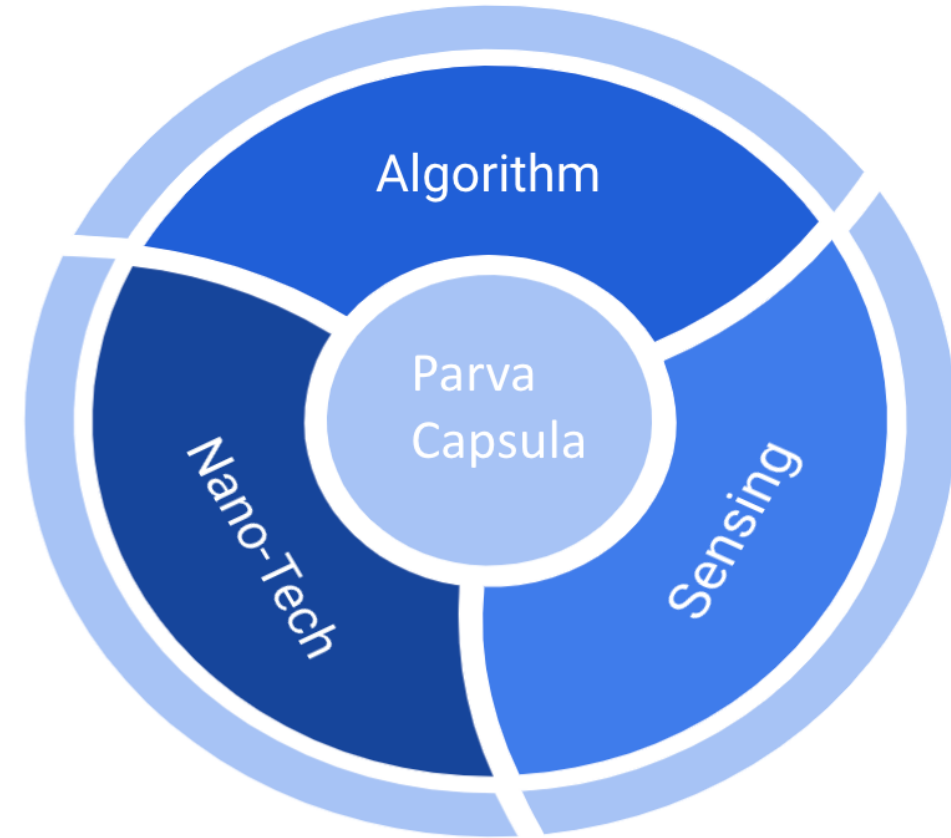

Problems and Opportunities

- Third most common cancer diagnosed
- 19 million colonoscopies performed annually
- Detect tumors and lesions before development
- Expensive Medical Costs

How Does it Work?

- Nanoparticle Technology-algorithm carrier
- High-Def Colored Camera/Biosensors
- Detects Tumors/Malignant lesions
- Deep Learning-powered image recognition

Value Proposition

Market Holders			Parva Capsula
Outputs raw data	✓	✓	Outputs raw data
Synthesizes/Analyzes data	✗	✓	Synthesizes/Analyzes data
Quickly synthesizes data	✗	✓	Quickly synthesizes data

Target Market/Profitability

- Target Market: Hospitals
- Algorithm: diverse revenue opportunities
- Manufacturing Cost: \$350; Market Cost: \$500
- Parva Capsula reduces cost by over 500%
